Subject Index

Accretionary bodies: Speculations on the petroleum geology of the accretionary body: an example from the central Aleutians, 151
Aleutian Trench: Speculations on the petroleum geology of the accretionary body: an example from the central Aleutians, 151
Atlantic: Tectonics, global changes in sea level and their relationship to stratigraphic sequences at the US ——— continental margin, 319

Blake-Bahama Basin: Palynofacies investigation of Callovian (Middle Jurassic) sediments from DSDP Site 534, ———, Western Central Atlantic, 3

Central North Sea: Upper Jurassic stratigraphy and sedimentary facies in the Central Outer Moray Firth Basin, North Sea, 105
Chalk fields: ——— along the Lindesnes Ridge, Eldfisk, 239
Chalk reservoirs: Porosity and hydrocarbon distribution in the North Sea ———, 211
Commercial development: Forecasting rates of hydrocarbon discoveries in a changing economic environment, 313
Continental margins: Sedimentary and structural patterns on the Iberian continental margin: an alternative view of continental margin sedimentation, 37
Collapse structures: Seismic response to ——— in the Southern North Sea, 27

Discovery rate: Forecasting rates of hydrocarbon discoveries in a changing economic environment, 313

Financial forecasts: Quantitative estimation of petroleum prospect outcome probabilities: an overview of procedures, 298
Forecast: Forecasting rates of hydrocarbon discoveries in a changing economic environment, 313
Formation evaluation: Relevance of induced polarization to quantitative ———, 14

Geochemistry: Organic geochemical study of the Upper Kimmeridge Clay Formation of the Dorset type area, 340
Graptolite: Organic petrography of ——— fragments from Turkey, 202
Growth faults: Volume change during sediment diagenesis and the development of ———, 118

Hydrocarbons: Forecasting rates of hydrocarbon discoveries in a changing economic environment, 313
Hydrocarbons: Porosity and hydrocarbon distribution in the North Sea chalk reservoirs, 211
Hydrocarbons: Seismic stratigraphic framework and depositional sequences in the Santos Basin, Brazil, 90

Induced polarization: Relevance of ——— to quantitative formation evaluation, 14

Kimmeridge Clay: Organic geochemical study of the Upper ——— of the Dorset type area, 340

Lindesnes Ridge: Chalk fields along the ———, Eldfisk, 239
Lithofacies: Palynofacies investigation of Callovian (Middle Jurassic) sediments from DSDP Suite 534, Blake-Bahama Basin, Western Central Atlantic, 3

Mid North Sea High: The nature of the connection between the Northern and Southern Zechstein basins across the ———, 355
Molecular distributions: Organic geochemical study of the Upper Kimmeridge Clay in the Dorset type area, 340

North Sea: Porosity and hydrocarbon distribution in the ——— chalk reservoirs, 211

Palaeoenvironment: Organic geochemical study of the Upper Kimmeridge Clay of the Dorset type area, 340
Palynology: Palynofacies investigation of Callovian (Middle Jurassic) sediments from DSDP Suite 534, Blake-Bahama Basin, Western Central Atlantic, 3
Petrography: Organic ——— of graptolite fragments from Turkey, 202
Petroleum geology: Speculations on the ——— of the accretionary body: an example from the central Aleutians, 151
Petroleum: Quantitative estimation of ——— prospect outcome probabilities: an overview of procedures, 298
Petrophysics: Relevance of induced polarization to quantitative formation evaluation, 14
Probability: Quantitative estimation of petroleum prospect outcome probabilities: an overview of procedures, 298

Reflectance: Organic petrography of graptolite fragments from Turkey, 202
Risks: Quantitative estimation of petroleum prospect outcome probabilities: an overview of procedures, 298

Salt dissolution: Seismic response to collapse structures in the Southern North Sea, 27
Salt: The nature of the connection between the Northern and Southern Zechstein basins across the mid North Sea High, 355
Santos Basin: Seismic stratigraphic framework and depositional sequences in the ———, Brazil, 90
Sea level: Tectonics, global changes in ——— and their relationship to stratigraphic sequences at the US Atlantic continental margin, 319
Sedimentary facies: Upper Jurassic stratigraphy and ——— in the Central Outer Moray Firth Basin, North Sea, 105
Sedimentation: Sedimentary and structural patterns on the Iberian continental margin: an alternative view of continental margin ———, 37
Sediment diagenesis: Volume change during ——— and the development of growth faults, 118
Seismic expression: The nature of the connection between the Northern and Southern Zechstein basins across the mid North Sea High, 355
Seismic response: ——— to collapse structures in the Southern North Sea, 27
Seismic stratigraphy: Sedimentary and structural patterns on the Iberian continental margin: an alternative view of continental margin sedimentation, 37
Seismic stratigraphy: Seismic stratigraphic framework and depositional sequences in the Santos Basin, Brazil, 90
Southern North Sea: Seismic response to collapse structures in the ———, 27
Stratigraphy: Evolution of the western Barents Sea, 123
Stratigraphy: Tectonics, global changes in sea level and their relationship to stratigraphic sequences at the US Atlantic continental margin, 319
Stratigraphy: Upper Jurassic ——— and sedimentary facies in the Central Outer Moray Firth Basin, North Sea, 105
Structural evolution: Evolution of the western Barents Sea, 123

Tectonics: ———, global changes in sea level and their relationship to stratigraphic sequences at the US Atlantic continental margin, 319

Western Barents Sea: Evolution of the ———, 123

Zechstein sedimentation: The nature of the connection between the Northern and Southern Zechstein basins across the mid North Sea High, 355
